SKILLS

- HTML
- CSS
- JavaScript
- Java
- Git
- Decision Making
- Problem Solving
- Time Management
- Creative Thinking

EDUCATION

Bachelor of Engineering in Computer Science IFET College of Engineering

2021-2025
CGPA: 7.20

Higher Secondary Education S.D.Eaden Matric Hr Secondary School

2019-2021
Percentage: 79.5

LANGUAGES KNOWN

- English
- Tamil

CERTIFICATION

- Cisco Certification(Python Essential-1, Introduction to cybersecurity, CCNAv7)
- Wipro talentnext(Java Full Stack)
- GUVI certification(python)

PROFILE SUMMARY

Java Developer skilled in HTML, CSS, JavaScript, and Spring Boot, seeking an entry-level role to build high-quality, responsive applications and enhance development skills, and eager to continue learning in a dynamic development environment.

PROJECTS

FLOOD RISK MANAGEMENT USING ML

- Designed a Flood Risk Management System (FRMDSS) combining machine learning with hydrological models for accurate flood prediction.
- Integrated real-time IoT data (rainfall, river levels, soil moisture) to improve flood risk forecasts.
- Supported resource planning and disaster response with real-time risk assessment and user-friendly interface.

HEART DISEASE PREDICTION USING ML

- Developed a predictive model for heart disease risk assessment using patient data such as age, cholesterol, and blood pressure.
- Applied machine learning algorithms, including logistic regression and random forests, to achieve accurate predictions.
- Aimed to support early diagnosis and preventive healthcare by providing reliable risk assessments.

DIGITAL BILLING APPLICATION

- Developed a responsive web application using HTML, CSS, and JavaScript to create a digital Bill Application allowing users to browse items categorized by the user.
- Implemented interactive features for user products, prices facilitating easy navigation and Save the Product then generateing Bill.
- Designed a user-friendly interface with seamless navigation between product categories and order pages, enhancing user experience and accessibility

WORK EXPERIENCE

Website Development Intern

Ram Software Website Development (June 2024)

- Developed and optimized responsive websites for client projects, ensuring smooth functionality and user-friendly design.
- Improved code efficiency to enhance website performance and load times across devices.
- Ensured adherence to industry standards for web development, maintaining high levels of quality, security, and accessibility.
